**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1, 2, 13, 14 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hill (US 4393366).

With respect to claim 1, Hill discloses: generating a signal pattern representing the intensity of pixels having a predetermined relationship with respect to the boundary

Art Unit: 2623

of the optic disk; and comparing the generated signal pattern to stored signal pattern to verify the identity of the individual, (see col. 1, lines 7-9, points out the comparison of the unique feature to the stored records for the identification of an individual, col. 3, lines 10-22 and figure 2, states that the optic disk is included in the image of the eye of the person to get the unique features). However, he fails to disclose: finding the boundary of the optic disk, as claimed. But, in figure 2, numerical 64 shows that there exists some sort of boundary around the optical disk (see col. 4, last line through col. 5, line 5) as claimed.

Therefore, it would have been obvious to one ordinary skilled in the art at the time of invention to simply modify the reference Hill to find the boundary of the optic disk to get the pattern of the optic nerve in order to obtain the unique feature of an individual. This modification will provide an apparatus that will identify an individual with increased speed and reliability by comparing the boundary pattern of the optic disk data.

With respect to claim 2, he further discloses: fitting an ellipse on to the optic disk, (see figure 2, numerical 64, there is an ellipse on to the optic disk) as claimed.

Claims 13, 14 and 16 are rejected for the same reasons as set forth for the claims 1 and 2 because claims 13, 14 and 16 are claiming similar subject matter as claimed in claims 1 and 2.
